Additional activities

- I have a blog named [Computação inteligente](#) in which I teach Artificial Intelligence/Machine Learning to Portuguese speakers. In Brazil, most people do not or have low proficiency in English, which limits them to learn concepts in this field. My goal is to fill this gap and help them to have access to this knowledge.
- I like to watch e-sport games, in particular, League of Legends. In order to get more insights about the game, I like to crawl data and perform some analysis on it. You can find these analyses on my blog.
- As you can see in my activities, I am very engaged in social projects. I always focus on using my knowledge for social good. Currently, my main goal is to help clinicians to improve skin cancer assessment for low-income people in Brazil.
